

Answers to Questions: Structural/MEP Engineering RFP

July 6, 2010

Question: With regards to Proposal Criteria No. 3. A-E, are you expecting all the requested information to fit “in two pages or less”?

Answer: We are looking for a two-page narrative to answer our questions about your firm. Feel free to add cutsheets, pictures, use black and white or colored pictures. We prefer 8.5 x 11 sized proposals but this is not a requirement.

Question: Please clarify if LEED Documentation/ LEED Energy Modeling will be part of the scope and there for should be accounted for in the fee proposal?

Answer: Neither the structural or MEP engineers will be asked to perform LEED documentation or energy modeling. The engineering team may be asked to provide information or coordination if the development team decides to participate in LEED certification or needs energy modeling.
