

Red Oak Park – RFP 07-2010 Materials Testing

Questions:

1. The proposal mentions sub-grade observation. Could you be more specific as to what type of sub-grade observations?
The sub grade observation will be for the City streets and sidewalks to the City of Boulder specs.
2. Will the asphalt testing be performed all at once or over the course of the project? You mention 10 asphalt tests, is that 10 visits?
Yes, the ten asphalt tests will be ten trips.
3. For caisson observation, do we need to observe all caisson placement or just a percentage?
For now we are assuming observations will need to be done all day for 40 days, it may change as we move forward.
4. Are the materials testing specifications based upon the city of Boulder Specs. or the plan specifications?
They will be the City of Boulder specifications.
